## **DETAILED ACTION**

### ***Response to Amendment***

1. The amendment filed December 5, 2005 has been entered; no new claims have been added.

### ***Election/Restrictions***

2. Claims 149 and 169 previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability.

### ***Allowable Subject Matter***

3. Claims 134-142 and 144-191 are allowed.
4. The following is an examiner's statement of reasons for allowance: A reference which is pertinent to applicant's disclosure -- Palmour ("Palmour") EP 518683 -- teaches neither the step of forming an ONO passivation layer on the sidewalls of a mesa and exposed portions of an n-type epitaxial layer (claims 134 and 156) nor the step of forming a second recess in an n-type epitaxial layer, wherein the recess in the n-type epitaxial being within a first recess in a cap layer (claim 171). The above limitations in combination with other claim limitations are not taught or fairly suggested by the prior art nor would it be obvious to modify the references of record so as to manufacture a metal-semiconductor/a gate structure for a silicon carbide FET of the instant application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
